Hi Blair,

Since people are asking about the subdivision and wetlands, it probably makes sense for you to send this out to the Board. I was copied on this message as the Conservation Commission contact, because this project involves NHDES wetlands review. The point of the project is to restore the wetlands to their location on the 2016 subdivision plan.

Mr. Price,

The purpose of this email is to let you know that I have been retained by Ross Engineering to evaluate a small (245 SF) incidental wetland fill at the above-referenced property (Assessors Map 19, Lot 1-1) owned by Zachary Elliott and prepare a program to remove the fill and restore the wetland. I will contact you again with more information going forward.
